

# Beyond Remembrance

As we think about transgender tragedy (including suicidality, anti-transgender violence, poverty, and more), **Visibility, Viability, and Vitality** remind us to move beyond trauma tourism and superficial response.

## Remembrance

Take the time to grieve over the brilliant lives that have been lost or are struggling. Our loved ones are more than statistics. **How can your grief be an opportunity for transformation?**

## Resilience

Find ways to support living transgender people in our daily struggles with grief and loss. **How are you building meaningful relationships that can make a difference in times of crisis?**

## Resistance

Change the patterns that put transgender people at risk. **How are you working to build a world where the lives of transgender people are truly valued and appreciated?**
